

Trellix User Manual

Author: Issa El Mokadem

Program: 2º DAW – I.E.S. Abdera

Project Type: Full-Stack Web Application (Task Board)

1. Introduction

Trellix is a Kanban-style task board that helps you organize projects visually. Create boards for different projects, add lists for each phase, and drag cards between lists as work progresses.

1.1 System Requirements

- A modern web browser (Chrome, Firefox, Edge, Safari)
- Internet connection (for weather widget)

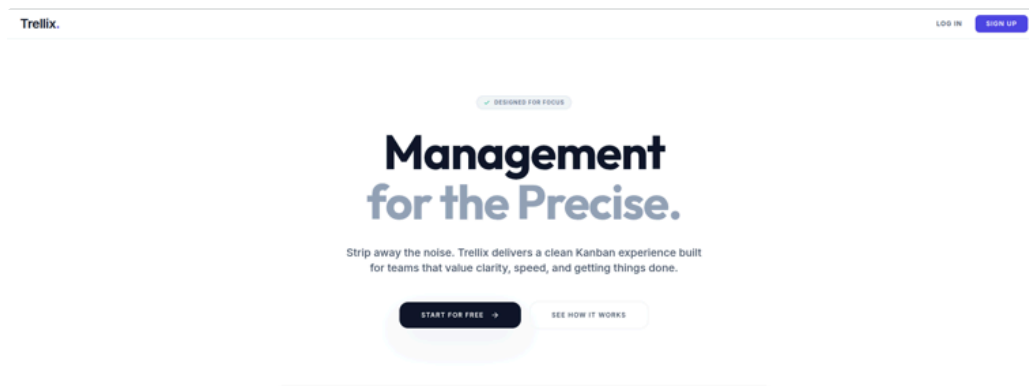

1.2 Access

Open your browser and navigate to the application URL.

2. Getting Started

2.1 Landing Page

When you first visit Trellix, you see the landing page with a brief introduction and buttons to **Log In** or **SignUp**.

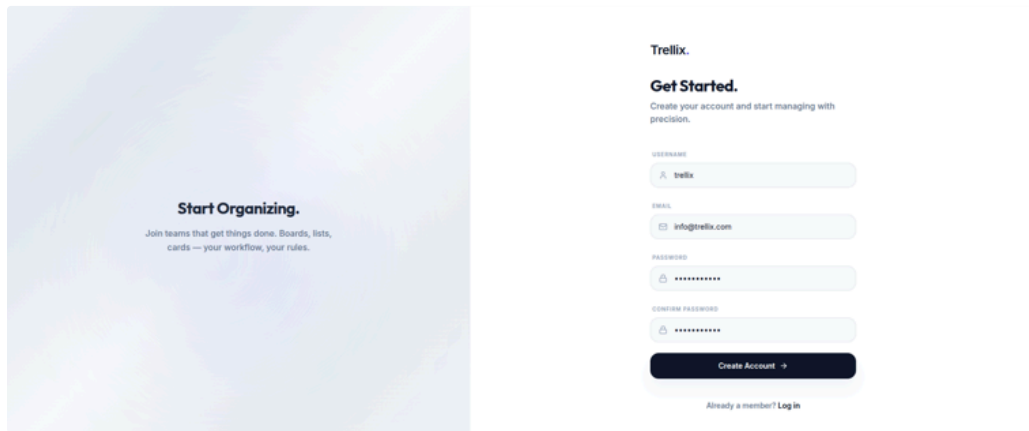

2.2 Registration

1. Click **SignUp** on the landing page
2. Fill in:
 - **Email** — used for login

- **Username** — displayed in the app
- **Password** — minimum 6 characters

3. Click **Create Account**

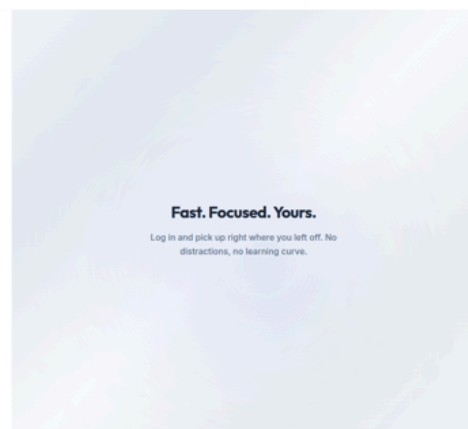

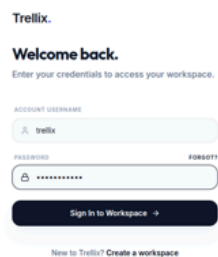

4. You will be automatically redirected to **Dashboard**

2.3 Login

1. Click **Log In** on the landing page
2. Enter your **email** or **username**
3. Enter your **password**
4. Click **Log In**

After successful login, you are redirected to the Dashboard.

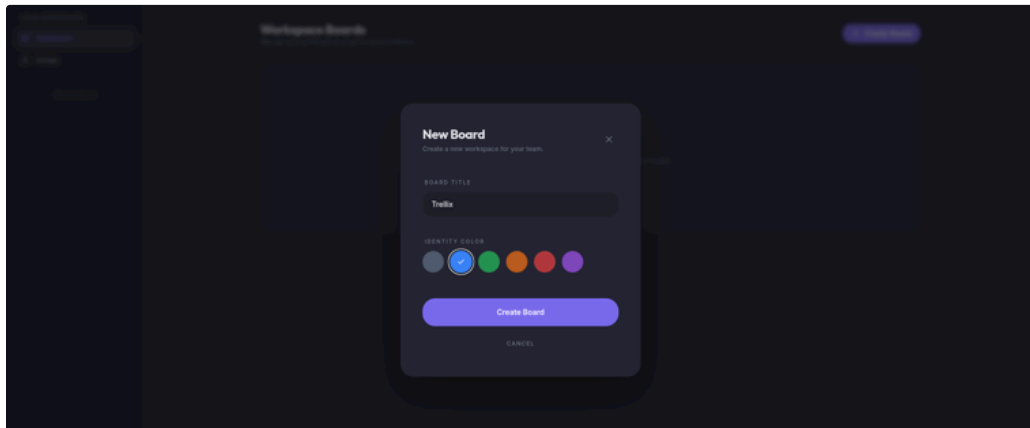

3. Dashboard — Managing Boards

The Dashboard is your home screen. It shows all your boards in a grid.

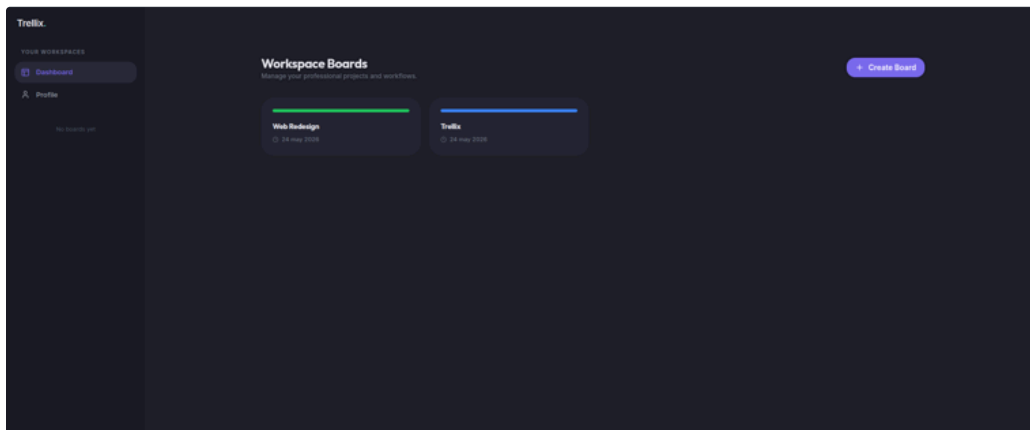

3.1 Creating a Board

1. Click the **Create Board** button (top right)
2. In the modal that opens:
 - Enter a **Board Title** (e.g., "Website Redesign")
 - Select an **Identity Color** (helps visually distinguish boards)
3. Click **Create Board**
4. The new board card appears in the grid

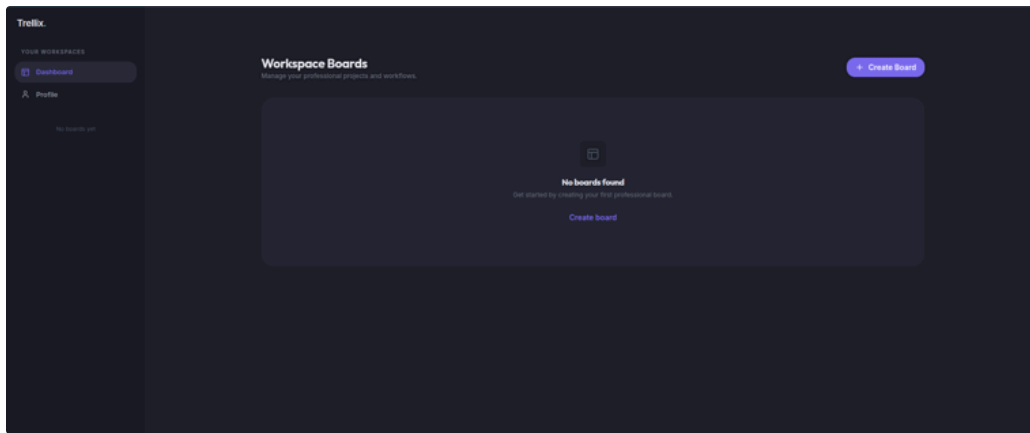

3.2 Opening a Board

Click any board card to enter the Kanban view. Each card shows the board title, color strip, and creation date.

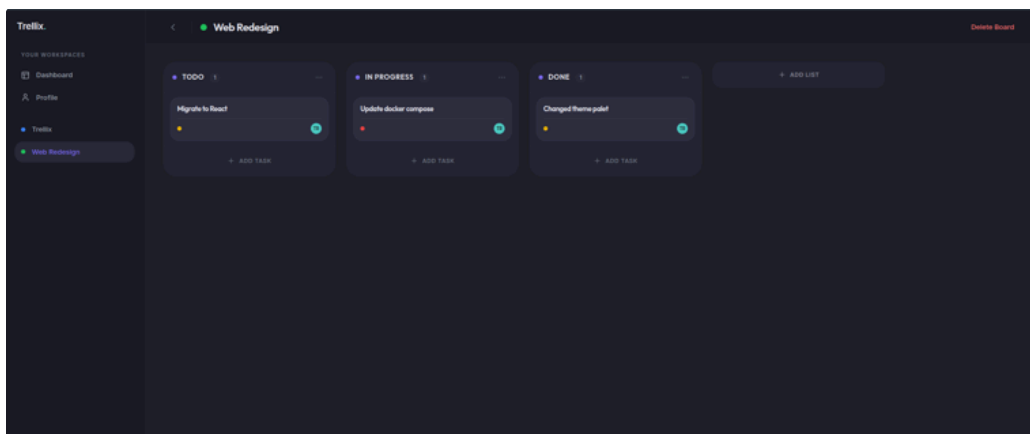

3.3 Empty State

If you have no boards yet, the dashboard shows a message: "No boards found" with a prompt to create your first board.

4. Kanban Board — Working with Lists and Cards

The board view is where you manage tasks. Lists represent phases (e.g., To Do, In Progress, Done), and cards represent individual tasks.

4.1 Creating a List

1. Inside a board, click the **Add List** button
2. Enter a title for the new list
3. Press Enter or click **Add List**

The new list appears as a column on the board.

4.2 Renaming or Deleting a List

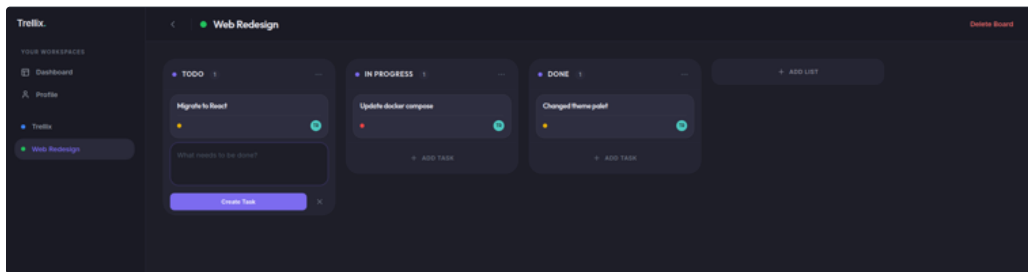

- **Rename:** Click the list title to edit it inline
- **Delete:** Click the **trash icon** on the list header

4.3 Adding a Card

1. Inside any list, click **Add Card** at the bottom

2. Type the task title
3. Press Enter

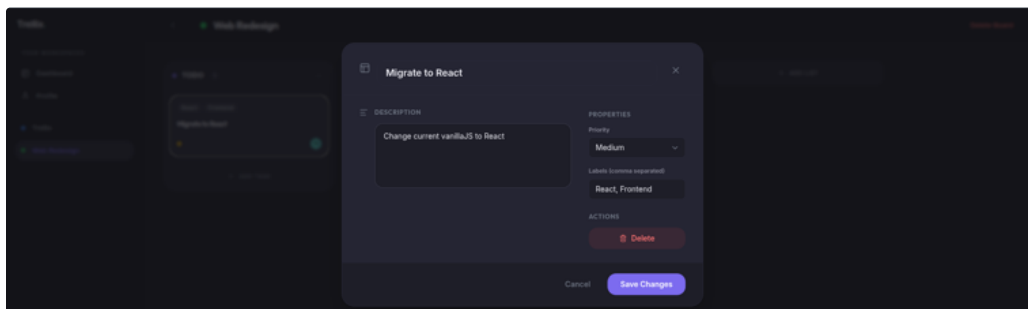

The card appears at the bottom of the list.

4.4 Viewing and Editing a Card

Click any card to open the edit modal. From here you can:

- Edit the **title** and **description**
- Change the **priority** (Low, Medium, High) — shown as a colored dot
- Add or remove **labels** (tags for organization)

4.5 Deleting a Card

1. Open the card modal
2. Click the **Delete** button
3. Confirm in the dialog that appears

5. Drag and Drop — Moving Cards

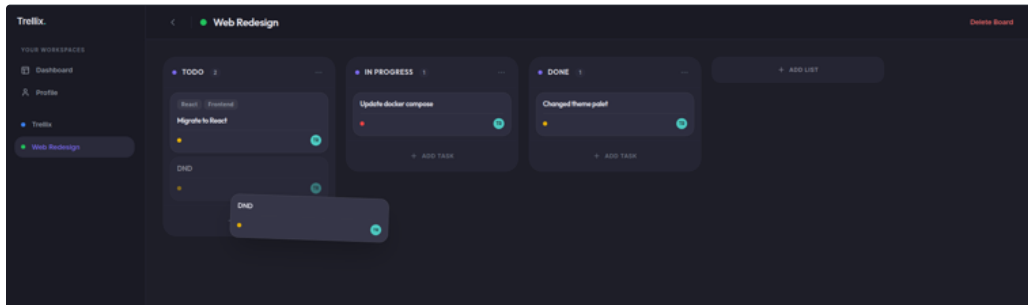

5.1 Basic Movement

1. Click and hold a card
2. Drag it to another list (or another position within the same list)
3. Release to drop

The card moves instantly. Changes are saved automatically to the server.

5.2 Visual Feedback

- While dragging, the card appears slightly transparent
- A visual copy follows your cursor
- The target list highlights when you hover over it

5.3 Error Handling

If the move fails (e.g., network issue), the card snaps back to its original position. An error boundary message appears with a **Retry** button.

6. Sidebar — Weather Widget

The sidebar on the left shows a weather widget that displays current conditions for a configurable city.

6.1 Viewing Weather

The widget shows:

- **City name** and country
- **Temperature** in degrees Celsius
- **Weather icon** and condition (Clear, Cloudy, Rainy, etc.)

6.2 Changing the City

1. Click the weather widget in the sidebar
2. A popover opens with a search field
3. Type a city name and click **Go**
4. The widget updates to show weather for the new city

Your chosen city is saved in your browser for future visits.

7. Profile Settings

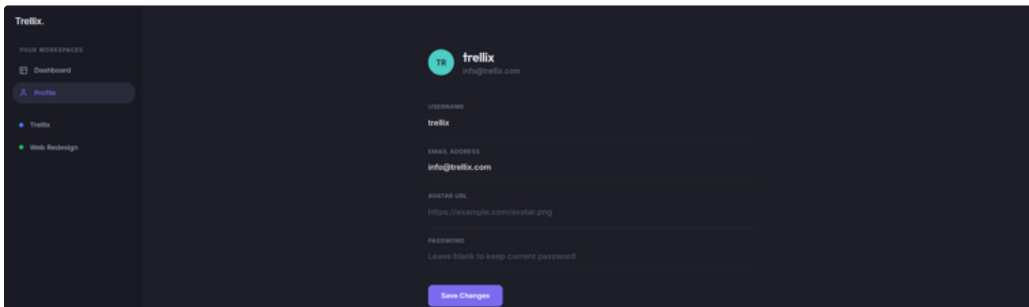

7.1 Accessing Your Profile

Click your avatar or username in the top-right corner and select **Profile**.

7.2 Editing Your Profile

From the profile page, you can update:

- **Username**
- **Avatar** (URL)

7.3 Logging Out

Click the logout icon in the bottom-left corner.

8. Admin Panel (Administrators Only)

If your account has the **Admin** role, you have access to user management.

8.1 Accessing the Admin Panel

An **Admin** link appears in the sidebar for users with the admin role.

8.2 User Management Table

The admin panel shows a table with all registered users:

Column	Description
Username	User's display name
Email	User's email address

Status	Active or Blocked
Actions	Block/Unblock toggle and Delete button

8.3 Blocking a User

Click the **Block** button next to a user. The user can no longer log in until unblocked. Their status changes to "Blocked".

8.4 Unblocking a User

Click the **Unblock** button next to a blocked user. Their access is restored.

8.5 Deleting a User

1. Click the **trash icon** next to a user
2. A confirmation dialog appears: "Are you sure you want to delete this user?"
3. Click **Confirm**
4. The user is permanently removed from the system

Note: you cannot block or delete your own admin account.
